MOHELA Definitions

User Types – This report contains information on forms submitted by MOHELA (when CRT_USER is an MO#). While we can view forms submitted by FedLoan Servicing and others (when CRT_USER is a P# or D#), we have not included this data on our report. Once FedLoan Servicing is no longer producing this report, MOHELA would like to know if MOHELA should begin including their information as well, since FSA will not have any other way to see it. We have included a list of relevant SSNs in an additional PHEAA SSN tab.

PHEAA PSLF Hold SSNs - We have included a separate tab that shows the FedLoan Servicing SSNs that we are tracking, but for which we are not reporting. **This includes all PHEAA SSNs regardless of status, and their status.**

Employer Addresses – Employer addresses are not captured in COMPASS and so you will see blank addresses under the PSLF Hold Detail tab. Now that MOHELA is processing forms in our LPX tool, which does capture employer address information.

Date Received – Under this column, MOHELA is providing the date created (CRT_DATE).

Denials – Currently we have received no denials, therefore the EIN Denials tabs are blank.
